

Mehmet Altuğ, Altınışık

I see architecture as a way to navigate life. New challenges come up often, and each one requires a balance between people and places, ideas and limits, beauty and function. I enjoy that sense of tension. It motivates me to listen, try new things, and keep working until I find a clear solution, often with help from others and by trying again. Alongside my studies, working with ceramics has improved my skills and taught me patience. Working with clay taught me that shapes can express feelings. I use this idea when I explore forms in 3D modeling with Blender and AutoCAD, but on a different scale. I learn best by doing things myself, watching closely, and trying again, because life is always changing and design helps me make sense of it.

Personal informations

Gender _ M
Date of birth _ 11/11/2002
Nationality _ Turkish
City _ Torino/Italy(Current),Sakarya/Türkiye(Hometown)
Mobile _ 0039 3898939024
Email _ mehmetaltug75@gmail.com

Work experiences

Period from/to (10/2023-06/2024)
Intern
Marco Visconti Architects

While interning at Marco Visconti Architects, I got my first real experience in architectural practice. I helped turn design ideas into buildable solutions and improved my skills in Blender and AutoCAD. The most valuable part was facing real-world challenges and working with a diverse team to solve design and technical problems at different project stages.

Education

Period from/to (09/2021-12/2025)
Bachelor degree
Politecnico di Torino

My studies in Architecture at Politecnico di Torino have provided a strong foundation in design thinking, technical problem-solving, and collaborative work. Over the past four years, I have participated in projects of varying scales, enhanced my abilities in team-based studios, and expanded my understanding of architecture through site visits and fieldwork. These experiences have shaped my professional approach and aspirations for the future.

Period from/to (09/2016-06/2021)
High School
Saint Michel French High School

Saint Michel French High School gave me more than language skills. Being part of a French–Turkish education exposed me to French culture and made me fluent in French and English, but most importantly, it trained my mindset: curiosity, research, and the habit of asking what lies behind an idea. That early push toward questioning and understanding deeply became a key part of how I learn and design.

Personal skills

Linguistic knowledges

Mother tongue Turkish

Other languages English C1, French B2, Italian A2

Certificates

English—C1 (advanced)
_ IELTS Academic 6.5 (B2/C1), 2021
_ Current level: C1 (self-assessed through daily academic use)

French —B2 (upper-intermediate)
_ Saint Michel French High School Diploma (equivalent to B2 level)
_ Current level: B2

Italian — A2
_ University Examination

Software knowledges

_ AutoCAD, Blender, Illustrator, InDesign, Photoshop, Revit 3DsMax, Archicad, Rhino, Twinmotion

Driving licence

_ Yes

Other experiences and competencies

Interests:

Tennis · Fitness (Powerlifting) · Photography · Travelling · Cooking & Tasting · Cycling · Ceramics

Experiences:

_Freelance Architectural Visualization

(Turin/Sakarya) 2023-2024

Produced 3D models and visualizations for architectural projects while studying. Delivered concept renders and spatial studies using Blender and AutoCAD, strengthening my ability to translate design intent into clear visual narratives under real deadlines.

_BEST Turin 2022 — BAC Edition (Parco Dora Pavilion):

Participant in the BEST Turin 2022 BAC workshop, designing a pavilion proposal for Parco Dora, Turin.

_Ceramics Exhibition: “Galip Tekin”

2018 - Exhibiting Artist

Participated in the Galip Tekin Ceramics Exhibition with two original sculptures

_ Ceramics Publication - Turkey

2017 - Contributor

Selected to contribute ceramic work to a national ceramics book in Turkey
